

Cyber Security Quick LookSM Management Review

Citadel's 2-hour *Cyber Security Quick Look*SM provides an organization with a bottom-line understanding of its cyber security needs and capabilities.

During our unique *Cyber Security Quick Look*, Citadel meets with an organization's senior leadership team to

- ▶ Review current cyber security trends and challenges.
- ▶ Identify sensitive information requiring cyber security management.
- ▶ Identify opportunities for cyber security management to provide a competitive advantage
- ▶ Review current cyber security management practices against emerging cyber security standards of care, such as PCI, HIPAA, FTC regulations, breach disclosure laws, and ISO 27001,02.
- ▶ Identify gaps between current cyber security management practices and those practices needed to more effectively secure sensitive information.
- ▶ Identify immediate next-step action items to improve cyber security management.

Citadel created its proprietary *Cyber Security Quick Look* in response to an epidemic growth of cyber crime. Several industry studies—coupled with our own extensive experience—document that the greatest leverage an organization has in meeting the challenge of cyber crime is to get the entire senior management team “on the same page.” That's what our *Cyber Security Quick Look* is designed to accomplish.

Citadel's *Cyber Security Quick Look* benefits any organization with sensitive information to protect or that is doing on-line bank transactions, regardless of industry or size.

Price: A very affordable, very high value, \$1450.

Call today to schedule your *Cyber Security Quick Look* management review. Benefit from our years of cyber security management experience along with our leadership in the Los Angeles cyber security community.
